

# AGFB Generator Cross Sections

J.C. Vaught

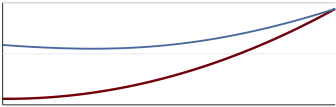

May 19, 2026

This document plots one horizontal image cross section for each public frame generator. The garnet curve is the sampled intensity. The Atlantic curve is the analytic gradient magnitude. The two curves are normalized separately inside each panel, so the plots are for visual profile comparison while the captions report the original intensity range and maximum gradient magnitude.

Intensity      g magnitude

## Polynomial Fields

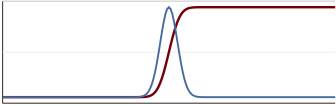

### Polynomial Surface Generator

Horizontal row  $y = +0$  px. I range -0.05521 to 0.995. g max 0.01123.

## Edges And Transitions

### Smoothed Step Generator

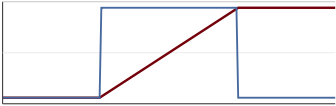

Horizontal row  $y = +0$  px. I range 0 to 1. g max 0.07979.

### Hard Step Generator

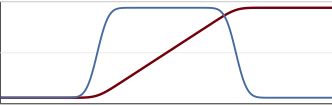

Horizontal row  $y = +0$  px. I range 0 to 1. g max 0.7979.

### Finite Ramp Generator

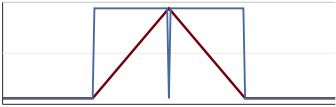

Horizontal row  $y = +0$  px. I range 0 to 1. g max 0.0125.

### Smoothed Ramp Generator

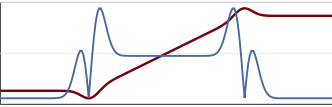

Horizontal row  $y = +0$  px. I range -2.123e-10 to 1. g max 0.0125.

### Roof Profile Generator

Horizontal row  $y = +0$  px. I range 0 to 1. g max 0.02273.

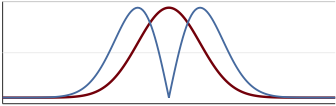

### Mach Band Generator

Horizontal row  $y = +0$  px. I range -0.1002 to 1.1. g max 0.02412.

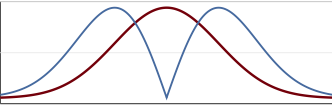

## Blobs And Scale

### Gaussian Blob Generator

Horizontal row  $y = +0$  px. I range 6.658e-07 to 1. g max 0.0337.

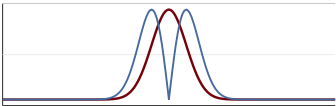

### Anisotropic Blob Generator

Horizontal row  $y = +0$  px. I range 0.005976 to 1. g max 0.02022.

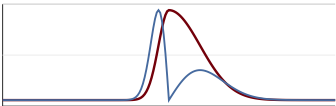

# Ridges And Bars

## Gaussian Ridge Generator

Horizontal row  $y = +0$  px. I range 9.721e-21 to 1. g max 0.06065.

## Asymmetric Ridge Generator

Horizontal row  $y = +0$  px. I range 0 to 1. g max 0.1011.

# Curved Boundaries

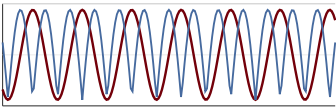

## Curved Arc Generator

Horizontal row  $y = +0$  px. I range 0 to 1. g max 0.07979.

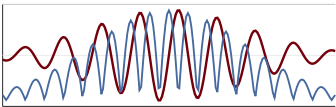

# Frequency Fields

## Sinusoid Generator

Horizontal row  $y = +0$  px. I range -1 to 1. g max 0.2199.

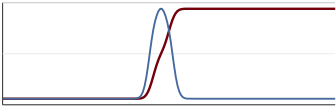

## Gabor Packet Generator

Horizontal row  $y = +0$  px. I range -0.9833 to 0.9833. g max 0.2827.

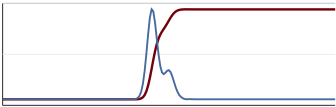

# Junctions

## Smoothed L Junction Generator

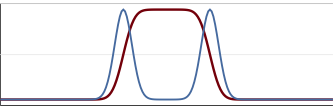

Horizontal row  $y = +0$  px. I range 0 to 0.9975. g max 0.1232.

## Smoothed T Junction Generator

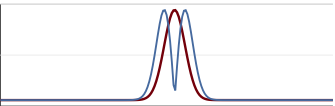

Horizontal row  $y = +0$  px. I range 0 to 0.9979. g max 0.1029.

## Smoothed Bar Generator

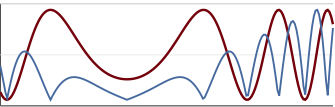

Horizontal row  $y = +0$  px. I range 0 to 1. g max 0.07979.

## Curved Ridge Generator

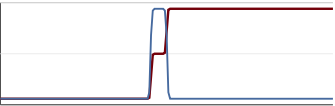

Horizontal row  $y = +48$  px. I range 0 to 0.9979. g max 0.1025.

## Chirp Generator

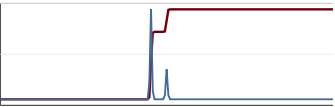

Horizontal row  $y = +0$  px. I range -0.9995 to 1. g max 0.2396.

## Hard L Junction Generator

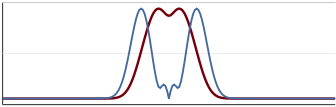

Horizontal row  $y = +0$  px. I range 0 to 1. g max 0.7979.

## Hard T Junction Generator

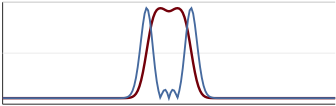

Horizontal row  $y = +0$  px. I range 0 to 1. g max 0.5984.

**Smoothed Y Junction Generator**

Horizontal row y = +0 px. I range 0 to 0.9473. g max 0.133.

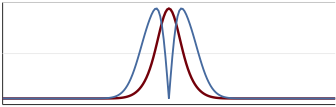

**Smoothed X Junction Generator**

Horizontal row y = +0 px. I range 0 to 0.9677. g max 0.1143.

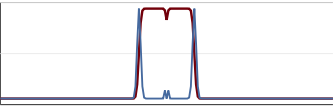

**Vessels**

**Vessel Crossing Generator**

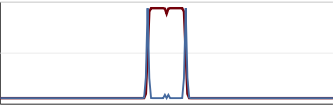

Horizontal row y = +0 px. I range 4.119e-23 to 1.75. g max 0.1591.

**Hard Y Junction Generator**

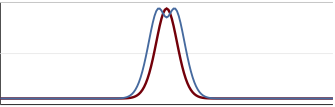

Horizontal row y = +0 px. I range 0 to 1. g max 0.7979.

**Hard X Junction Generator**

Horizontal row y = +0 px. I range 0 to 1. g max 0.6873.

**Vessel Bifurcation Generator**

Horizontal row y = +0 px. I range 7.096e-42 to 1.5. g max 0.2377.
